

Master of Science (MSc) in Physics

with concentrations in

- Scientific Computing
- Advanced Material Physics and Technology

The Program

Duration: 1 year (full time) / 2 years (part time)

- Upgrade and strengthen knowledge in core areas of physics
- Gain knowledge of advanced materials for applications in next-generation devices
- Learn simulation and programming tools to solve real world problems
- Receive guidance under experts in the fields

Admission Requirements

- English language proficiency mandated by the University
- A bachelor's degree in Physics/Applied Physics, Optics/Photonics, Mathematics, Materials Science, Computer Science, Electronics and Electrical Engineering or a related discipline, OR
- A bachelor's degree in other disciplines with at least two years of relevant full-time post-qualification work experience
